CANCERS CURED  
By a new, but certain, speedy, and nearly painless process, the cure will be guaranteed, and as proof of this, no money is required, until the cure is effected. The cost of the cure will be paid by the patient, as a will cost less and is more speedily effected. What impious hand disturbed the place of rest, and in a gloomy slumber thus maddened the woman?

Forfeiture of a fragment of some female form!—

Of nature's workmanship the man and beast—

In the anatomy His wonders true—

With pure leisure than when silent sleep—

With a gentle smile, and a quiet peace,

And fearless symmetry, which made him sigh.

Though from these now he turns his gazing eye.

Let those whose folly seeks to draw a line

Between the sexes, and the sexes and death,

They cannot; God, immutable and just,

Is man that makes the monarch and the slave?

Those that once enthused in high state,

Audited the circle of the drawing room,

But not the circle of the drawing room,

Alas! that the man of wealth and marble tomb,

As if the bones of stony stolid noble form!

Should be reserved for better sorts of worms?

Perchance that not at some human walk of life,

He who promised this name of wife,

And praised thy symmetry, but thy beauty,

The art of thy form, and thy grace,

That ready believed his flitting tongue.

That perfect mechanism may have served

Sounds open draughts, and every grace—

When quickly soars a young and blushing face,

When subsumed to the drawing-gaze

Of the eyes that make the human soul full-blaze

And where's the soul that o'er thy frame once shied

The poetry of motion? Who can tell

What art thou?—What art thou?

Or if each thought of all its earthly ties

From the memory who die.

New York, Aug. 27.—A letter from Cannington from Texas says, we are in Texas on the eve of another war which will be more destructive than the last. The rebels have just emerged. The former leaders in rebel have some dozen Union men, and they are now more hotly engaged than ever. The rebels are held in many parts of the State in a constant bondage as before the war, and Union men do not speak their sentiments openly. Next month, the K. G. C. are organized all over the State, and the Union men are uniting from Macon, Atlanta, and the like, and Shelby, and a more desperate set never before infested any country. Murderers are everywhere. The civil law is dead and cannot be re-enacted. The rebels are kept in the most important towns that will not be a Union man left in six months. Col. Crawford was taken suddenly ill last night, and, for a few hours, lay in a most dangerous state; but thanks to the care and skill of his medical attendant, Dr. O'Donnell, of Montreal, Surgeon to the Battalion, he is now in a fair way of recovery.

A report showing up the financial affairs at the Moffat Mansion, as they were found on the resignation of Col. O'Mahony, has led to a great deal of trouble.

# THE HASTINGS CHRONICLE.

BY ATLANTIC CABLE.

Liverpool, Sept. 8.—A quantity of Fenian munitions of war had been seized in Liverpool. The Foreign, Standard, and Liverpool Mercury, and the Daily Post have transmitted their resignations to the King. The *Advertiser* says that until after a vote in *Venice*, no change will be made in the political and military administration of that country.

Venice, Sept.—The Saxon Royal family have held a council on the intention of the King to abdicate. The result is not stated.

Paris, Sept. 8.—The Foreign has resigned as British Ambassador to France.

The German Gazette and Belgian Press are hostile to Bismarck's bill for the annexation of Schleswig-Holstein, and, hence for the future are neutral.

Lord North died to day.

The Right honourable W. Gladstone, in a speech at Salisbury last evening, has urged the Liberal party to do all they can to get a good reform bill brought forward in Parliament by the Derby administration.

New York, Sept. 8.—The following items are received from the City of Boston:

Count Ricasa delivered a most significant speech in the Prussian Legislative Assembly yesterday, in defence of the Prussian army, and held on to keep what is offered to her; that a European Congress would produce war; and that the crowd in the determination to defend its territorial acquisitions. The opinion desired the consideration of the power of the Prussian army.

Polish accounts from Cracow assert that the insurrection in Poland has been suppressed by the Russian Regiments, and being joined by revolutionary Russians had marched towards the frontier.

The *Times* will bring the 32nd Foot to Quebec, and the *Advertiser* the 100th Royal Canadian Regiment.

The Turkish authorities are alarmed by the insurrection in Candia. Constantinople has been declared a state of siege.

A New Orleans newspaper contradicts the rumoured conviction of Maximilian in favor of Prince Napoleon.

A despatch to the *Associated Press* dated New Orleans, Sept. 7th, says:—The state of mind current here that Maximilian had abdicated the Empire of Mexico is only one of those which we have received from the various independent public stations. I have very high public authority for stating that the rumor is in no wise true, though it is officially believed that Maximilian was very nearly induced to do so for the departure, access to the palace having been denied for several days, while this was being.

It is also believed that the French authorities absolutely refused to permit the departure of the Emperor to the United States.

The so-called Emperor will, however, leave Mexico at an early day, but not abdicating, as is stated, in favor of Prince Napoleon.

President Juarez has had a visit at Matamoros, though he will soon be in that city.

CONFEDERATION.—The London *Morning Post* in its city news of British Colonies has mentioned only agreed to an Imperial guarantee for the \$4,000,000 loan required for the British North American Confederation, but have consented to guarantee further sums for the payment of bonds of the Hudson's Bay Company.

It is, however, a state of mind which it is considered should be included in the confederation.

EF A letter from Rome in *L'Opinione Nazionale* asserts that the needle gun was nearly adopted in the Papal army, when a carbine was chosen. The author of the letter had not been met in any Catholic army, it was not for Rome to show too much eagerness in an invention with which the Luthers had been inspired by the Prince of darkness.

EF The reported ill health of Louis Napoleon has been denied by the French Foreign Minister, who says that he is in full possession of his faculties, which scarcely ever makes such an acknowledgment when the Emperor is concerned.

In addition to the goot, which is said to be a chronic disease, he had an attack of consumption of the brain, rendering necessary what is almost impossible in his position—a cessation from mental labor.

EF Tenders for Provincial Debentures are sent in rapidly. On Saturday one entered for the Province of Quebec for \$100,000 worth. A resident of Quebec is said to have taken \$60,000 worth. It is explained by the paper that parties wishing to purchase Debentures may obtain them at par, by transmitting money to the credit of the Receiver General, and when we receive the receipt or Debenture will be forwarded.

EF Le Canada states that a Canadian merchant has made some extensive contracts with a French house to supply it with lumber and other articles indigenous to the country, and claims that this engagement is one of the first fruits of the Free Commissioners' mission.

Rev. H. J. Upton, rector of the First Baptist Church, Lancaster, N. H., has been invited by Mrs. A. A. Allen's *World's Hair, Beard, and Zylotabacum*, and can cordially recommend those to whom they wish to have their gray hair removed to the *World*. I am sure the Restorer is not a dye, as it has been thoroughly tested it. Sold by all Druggists, 100 Grand-st., Boston.

It will be remembered that the Bill for suspending the issue of paper for the Legislative Council, elections to the House of Commons, and other articles, was introduced by His Majesty's pleasure on the 21st of June, 1857. The *Moniteur* and *Standard* of Quebec, and the *Advertiser* of the Colonies, via the Atlantic Cable, that the Royal sanction will forthwith be given to the measure.

EF The Fenian Congress at Troy. The Fenian correspondent in the *Advertiser* to prevent frauds on the revenue, thirty distillers in New York are not able to make their true pay, it seems, have modified the revenue authorities that they intend to do so.

Prax Davis' *Patent* Hair, Beard, and Zylotabacum, and are as reliable as any in the market, and are to be had in every druggist's shop in the country.

# THE HASTINGS CHRONICLE.

## GRAPPLING FOR THE CABLE.

St. John's, N. F., Sept. 2.  
The Terrible arrived here as soon to day. She left the cable foot on Wednesday. At that time the Great Eastern was starting for a spot one hundred miles east of the point where the cable broke last year, all attempts to successfully raise the cable in the twenty-two previous fathoms depth having failed. The following is a minute abstract from Mr. Bowles' diary:

Sunday, August 12.—Great Eastern joined the Terrible and Albany at the rendezvous. The Albany had hooked the cable previous to the Great Eastern coming up, and was the first to bring up the grapping rope, about 13 and 14 fathoms.

August 14.—Mr. Canning being satisfied by the strain on the dynamometer, increasing to nine and a half tons, that the cable was hooked, at 1 o'clock every thing was made ready to let go a large buoy, with receiving rope attached. Here the first damage was sustained, the cable being torn in the grapping rope and buoy rope having drawn. Fortunately no one was injured.

August 17.—Drifting.

August 17.—At eleven o'clock (ship's time) the cable came to the surface at the bows of the Great Eastern, but while all were congratulating themselves on this great success the cable slipped off the grapples and dissolved.

From this date up to Wednesday evening, the 29th, we were grappling with various success. On one occasion the Albany brought up two miles of the cable. The weather is very unfavorable. At the time the Terrible left it was decided to go east one hundred miles, where the water is only one hundred and twenty fathoms.

(Qu. 7 1600.)

The Cable of 1865 successfully laid by the "Great Eastern."

HEART'S CONTENT, Sept. 5th—Received Sunday, Sept. 9th, 12 p.m.—Since Sunday an unusual number of people have shown the Great Eastern, and she laid the second and third of the cable of 1865 on Saturday evening, at 4 o'clock, under a salute from the ships of-war in the harbor, and tremendous cheers from a large crowd of enthusiastic spectators, assembled from all parts to witness the second triumph of ocean telegraphy, even greater than that of 27th July. The electrical condition of this cable is most perfect, and messages are now being sent and received with it.

The Great Eastern arrived at Rendevous Bay, 65 miles from here, at eight o'clock on Friday evening, where she was met by Her Majesty's ships Terrible, Lily, and Margaretta Stevenson, who accompanied her up the bay. The night was dark but fine, and everything went on smoothly.

The steamer Hack, with a large party from St. John's, arrived to-day, being a delegation from the Chamber of Commerce of St. John's, to present congratulatory addresses.

The Great Eastern sails on Sunday for England. The Medway also leaves on Sunday for the Gulf of St. Lawrence, with Messrs. C. W. Field and A. M. McKay on board, to lay a second cable from Port au Basque to Aspey Bay. The Medway is accompanied by the Terrible and the Lily.

The Cable Ballast off at St. John's on Tuesday, Sept. 10.

The strand end of the cable was brought to the telegraph building. Immense enthusiasm was manifested by the people—Messrs. Canning, Clifford, and Field were severally saluted by the crews from the men-of-war, sided by civilians, hoisted over the heads of the people, and chaired.

This evening the St. John's delegation were received by the cable people or board of the Great Eastern. Everybody here is frantic with joy.

BY ATLANTIC CABLE.

Berlin, Sept. 4.—Sixty thousand Prussian troops are ordered to the Rhine. Prussia is treating for the purchase of the iron-clad *Duisburg*. Peace with Hesse-Darmstadt; cedes some of its Northern part, and pays three million of thalers. Hesse-Homburg also goes to Prussia. Count Bielmark refused to see the deputation asking the return of North Schleswig to Denmark. Baron von Bismarck was appointed Under-Secretary of Foreign Affairs. Count Metternich, the Austrian ambassador, has been recalled.

London, Sept. 5.—The return of the Atlantic Cable Company shows their receipts from messages to be at the rate of £300,000 per annum.

Berlin, Sept. 5.—Darmstadt has complied with the demands of Prussia, and will pay the latter three millions of francs, before sending to Prussia some of her territory.

Athens, Greece, Sept. 5.—Hope is frequently expressed, with some prospect of realization, that the pacification of the revolt in Crete will soon be accomplished.

Florence, Sept. 5.—Prior to the signature to the treaty of peace, Italy will dismiss 120,000 soldiers.

London, Wednesday evening, Sept. 5.—The first official conference for the establishment of peace between Italy and Austria was held at Vienna on the 3rd inst. The draft of some of the articles of the treaty was signed, and the arrangements for the transfer of Venetia, between Austria and France, to Italy, and the evacuation of the Quadrilateral by the Austrians are in progress.

London, Sept. 3.—Affairs in Savoy now assume a warlike aspect. The Saxon troops have been withdrawn from Hungarian frontier, and the army is being provisioned.

The treaty of peace with Prussia binds Austria not to interfere.

Southern German journals claim Austria was brought into the war with Prussia, in making a separate peace.

Dresden, Sept. 7, p.m.—The Prussian governor of Saxony has prohibited the holding of public meetings throughout the kingdom during the state of siege under which it is situated.

ROCHESTER, Sept. 5th.—A shocking accident occurred on the New York Central Railroad, six miles east of this city, about 5 p.m. on Tuesday. A train, consisting of about 50 and many others wounded.

The steamboat express train which left Albany this a.m. was thrown from the track by a switch carelessly left open. The train was running fast, and in a curve the engineer gave the signal to "break" and jumped out to stop the train. The engine, however, continued to run, and the train, which had stopped, was carried into the switch, and the engine, which was next to the baggage-car, ran together in the form of a telescope, and were left in a heap with the baggage-car. The loss of life and injury to passengers generally was confined to these three cars. The number of those killed and injured was 45, and 45 wounded. The only Canadian names in the list are, David Crichton, Newton, C. W.; L. Owen, Brampton, C. W.;—killed, John Pacon, Brampton, C. W., Wounded, ribs broken.

The bodies of the dead and injured were brought to this city at 2 p.m., and every thing is being done that can be for the comfort of the sufferers.

The publication of the N. O. Tribune has been resumed. Gen. Sheridan is determined to protect its proprietors.

## NEWS OF THE DAY.

Yesterday's Paris telegrams report the continued ill health of Louis Napoleon. The report of the probable marriage of the King of Greece and Princess Louise of England is contradicted. The Queen of Spain visited the Emperor, King of Austria, etc. The English Franklin and the *Times*. The waters of the Rio Grande have risen so high as to threaten to wash away the town of Matamoras. Marshal Bazaine is about to open an extensive campaign in Northern Mexico. It is reported that Tamico has been retaken by the French. M. de Dreyse, the inventor of the breech-loading rifle, has died. The Duke of Wellington has a special rifle of his invention to artillery, and has constructed a "needle" cannon. Since Lord Derby's accession to power—about two months—he has had the nomination to four judgeships, a bishopric, two garters, and two lordships, and has created six peers, three baronets, and a dozen privy-councillors.

The General Macdonald command of the Department of the East, to which he was recently appointed. It includes the whole of our frontier and most of the Northern States; and as he has proved himself a man of strict integrity and a soldier, in the highest sense of the word, the appointment will be satisfactorily received in Canada.

Market Report.

Grain is not yet coming forward in very large quantities, but as Farmers will soon have grain in store, the market will soon come in.

FLAT WHEAT, \$10 a ton &c. Very light receipts.

SPRING WHEAT, \$10 a ton &c. Very little offering.

RYE, \$10 a ton &c.

WHEAT, \$10 a ton &c.

# THE HASTINGS CHRONICLE.

CURIOSITIES OF ATLANTIC TELEGRAPH.—The Courier du Havre sets forth a striking result of the laying of the transatlantic telegraph. It says:

New York is almost at 76 degrees longitude from Paris. The earth in its daily rotation travels through 360 degrees in twenty-four hours, from which it results that every fifteen degrees to the west of the meridian placed at Paris is one hour later. When it is noon at Paris it is only 11 o'clock at 15 degrees to the west of that city.

And in New York it is 76 degrees to the west of Paris, it follows that it is seven o'clock in the evening at New York when it is midnight at Paris. Suppose, then, that a great edifice in Paris, the Opera for example, takes fire at a quarter past ten at night on the 1st September, the event will immediately be telegraphed from Paris to New York and is dated "Paris, a quarter past twelve at night, 1st September."

The news arrives in New York, let us say, in two hours, to make ample allowance for interruptions, &c., the date will be 1st September, 1866, in New York at a quarter past twelve at night on the 31st of August, so that a New York manager could appear on the stage, and after the three customary bows, could thus express himself:

"Ladies and gentlemen—I am sorry to have to inform you that the Opera at Paris has been destroyed by fire three hours ago in the present time. Our director will just transmit to his Paris conferees his condolence on the disaster which is going to happen to him."

THE ATLANTIC CABLE USED TO LIGHT A CANAL.—*L'Evenement* of Paris, in its London correspondence, tells a good story of an English nobleman, in connection with the Atlantic Ocean Telegraph. Upon the news of the successful laying of the cable coming in London, so the story goes, one of the most distinguished members of the House of Commons flew up to the central office of the Telegraph, and wanted to send a message to Newfoundland. He was politely informed that the line was not yet opened for business. His lordship, however, daunted, said that he had a large number of shares in the company, and put down two hundred guineas. Upon this he was promised that an effort would be made to send his message through. What he sent was his messsage through.

To the *Telegraph Operator at Heart's Content*—Send on the strongest electric spark your machines are capable of, but give one minute's notice beforehand.

In due time, the lordship waiting patiently some twelve hours, the spark came, and his lordship lit his cigar with a cigar lighter, therapeutically ignited from Newfoundland, and was fully satisfied.

Montreal, Sept. 1.—One of the regiments coming out from England is to be stationed at Quebec, and another at London. The war will be kept near the frontier in Lower Canada. All the regiments now available have gone over to Brother Jonathan with thousands of dollars that don't belong to them.

At one part of the Lower Canada frontier 150 farmers are providing themselves with ball, nine shooters, and breech-loading rifles.

The counsel of Lamairde have telegraphed to the government in London to apply for a militia corps. The papers were sent by mail yesterday.

The *Huntington Gleaner* complains that about three thousand dollars are still due the volunteers in the county, and says that much dissatisfaction prevails.—*Globe*.

The London Times of the 23rd ult., states that in addition to the twelve batteries of Royal Artillery now in the War Department, an immediate train of 100 guns, the authorities of the Royal Arsenal at Woolwich had been instructed to prepare for despatch to the same destination a large number of 26 pound, 12 pound, and 9 pounder guns, together with 40,000 rounds of prepared cartridges, ammunition, shot and shell, to be shipped at the earliest possible date. It also says that General Peel and Lord Longford, Secretaries of State for the War Department, visited the Arsenal on the day previous, and satisfied themselves that the twelve batteries of artillery would be ready for shipment by the end of this month (August).

A Berlin correspondent of the *Colonial Gazette* says that Count Bismarck is not to be created Duke of Lausenburg, as some journals have asserted, that title being in fact borne by the King of Prussia, not Prince Bismarck.

Conscience is not yet dead in the country. The Receiver-General acknowledged the receipt of \$160 for duty on goods imported several years ago.

The St. Joseph (Mo.) Union says that farmers residing a few miles south of that place reported to the Sheriff on the morning of Aug. 21, to think of the fact that their horses had been taken away in 1860. A week previous to the thermometer in that region indicated a temperature of 100°, and even higher.

**FANNING'S  
LIVERY STABLE  
AND  
OMNIBUS LINE.**

FRONT STREET, BELLEVILLE.

W. FANNING begs to announce that his Livery and Omnibus line are still at the service of the public, and have by the courtesy of his patrons been allowed to continue to the market, the same of his patrons to continue to merit the same of his patrons bestowed upon his late Father for the past thirty years. The Stable has been having entirely rebuilt, the Stable, the Coach and the carriage, the horses, &c., in first-class and carriage omnibus, &c., in first-class and carriage order. Only the best horses and carriages will be allowed to have the line.

Omnibus line will always be waiting at the Standards and cars, to convey passengers to any part of the town.

Don't forget the stand, Front Street, one of the oldest established Livery Stable in the Province.

WALTER FANNING,  
Belleville, July 2d, 1866.
